Online Training Courses on the Strange & Unusual

Since I write a lot of books on strange and unusual topics I thought that doing this FREE EBook about the online training courses I'm offering would be a good way to make people aware of their value.

I've written over 150 books in the last seventeen years based on my experiences and research.

Although I'm an Engineer and worked many years in that profession I've also experienced many paranormal phenomena and so I know there is much more reality outside of what science and engineering currently say is possible.

My analytical background it gives me the ability to write and research about many "out of the box" topics and provide some real clarity to the questions most people have on these subjects.

My website: http://mkettingtonbooks.com shows over seventeen categories of books I've written based on personal experience and my research on the subjects in question.

Online Training Courses on the Strange & Unusual

1.0 Introduction

Since I write a lot of books on strange and unusual topics I thought that doing this FREE EBook about the online training courses I'm offering would be a good way to make people aware of their value.

I've written over 150 books in the last seventeen years based on my experiences and research.

Although I'm an Engineer and worked many years in that profession I've also experienced many paranormal phenomena and so I know there is much more reality outside of what science and engineering currently say is possible.

My analytical background it gives me the ability to write and research about many "out of the box" topics and provide some real clarity to the questions most people have on these subjects.

My website: http://mkettingtonbooks.com shows over seventeen categories of books I've written based on personal experience and my research on the subjects in question.

Lately, I've devoted myself to taking this all to the next level by developing online training courses based on my books. The research and validated experiences in these books provides a great foundation for some great courses you will find you can sign up for.

One example is my course on Irish Mythology where I take the best information from several books into the course.

Each book has lessons, exercises, summaries, and also audio and video files to further illustrate the teachings. You will find each course offers wonderful and unique information which will be of value to you the student.

There is also a formal longevity coaching certification for completing the course work and tests for each section.
